

Name _____

7th Grade Scratch Project

You will create a project using the website Scratch. Your project will share information you have learned in your classroom. Your project can be from any subject area and can range from making a movie to creating a game. Examples can be found below. You must have your project approved by me before you begin. Use the back of this sheet to brainstorm your ideas for this project.

Examples:

- Create a game using science or reading vocabulary
- Create a movie to illustrate a science or social studies concept
- Create game for users to practice a math concept
- Create a short story that is a retelling of something you read in class

Grading:

	0 points	1 point	2 points	3 points
<i>Concept</i>	Student displayed no understanding of the concept they were illustrating	Student displayed little understanding of the concept they were illustrating	Student displayed some understanding of the concept they were illustrating	Student displayed complete understanding of the concept they were illustrating
<i>Execution</i>	Student's creation did not work	Only a small amount of the student's creation worked without error	Student's creation worked mostly without error	Student's creation worked seamlessly
<i>Effort</i>	Student's project is incomplete.	Student displayed little effort and creativity	Student displayed some effort and creativity for their creation. Project could have been improved upon.	Student displayed great effort and creativity for their creation. Project looked professional and well made.

Self-Evaluation:

Concept: I believe I deserve ___points because _____

Execution: I believe I deserve ___points because _____

Effort: I believe I deserve ___points because _____

Scratch Project Planning Guide

Concept I would like to do my project on:

How will I show what I know? What kind of project will I make?

What specific concepts/idea/vocabulary do I need to include?

How do I want my project to look? (draw or write)
